## Conflict Minerals Disclosure Report

**Revision Date:** 5/30/21

**Approved By:** Shawn Jensen – Manager of Operations and Purchasing

**Reviewed By:** Ann Ting – President

This manual is the property of Transource Services. It must not be reproduced in whole or in part or otherwise disclosed without prior written consent from Transource Services.

The official controlled copy of this manual is a Word document on the Transource network server and visible to all authorized users. All printed copies, and all electronic copies and versions except the ones described above, are considered uncontrolled copies used for reference only.

This document is controlled as a single entity, as any change – however slight, even a single character – to any part of the document by definition changes the entire document. For this reason, as well as the fact that the concept of “page” varies with the publication format, page-level revision is not practiced with this or any other Transource Services document.

## **Section 1 — Conflict Minerals Disclosure**

### **Item 1.01 Conflict Minerals Disclosure and Report**

Transource Services Corp commitment to acting in an socially and environmentally responsible manner will ensure that we will do our diligence in ensuring that products purchased for our OEM Desktop systems are not being sourced by us or any of our suppliers from areas considered “Conflict minerals” as defined by the US legislation. Currently these include the metals tantalum, tin, tungsten and gold, which are the derivatives of the minerals cassiterite, columbite-tantalite and wolframite, respectively. The SEC rules define conflict minerals as 3TG metals and wherever extracted from South Africa in Sudan, Central Africa Republic, Congo Republic, Democratic Republic of the Congo, Uganda, Tanzania, Angola, Zambia, Rwanda or Burundi. We engage in ongoing supplier communications regarding the substance of conflict minerals and our objective of responsible sourcing of these minerals. We routinely request confirmation from our main system product suppliers to confirm where raw product is being procured.

#### **Conflict Minerals Disclosure**

This Specialized annual public Disclosure Report on Conflict Minerals, filed as Exhibit 1.01 are publicly available at [www.transource.com/epeat/conflictmaterials.pdf](http://www.transource.com/epeat/conflictmaterials.pdf).

### **Item 1.02 Exhibits**

The Conflict Minerals Report required by Item 1.01 is filed as Exhibit 1.01 to this Form SD.

#### **Attachment B - 3TG Facility List**

## Signatures

Pursuant to the requirements of Transource's annual public disclosure on conflict minerals report to be signed on its behalf by the duly authorized undersigned.

Transource Computers

## **CONFLICT MINERALS REPORT OF TRANSOURCE SERVICES CORP.**

Transource Services Corp is an OEM of Desktop Computers and resells numerous products. We specialize in customizing computer systems since 1984 and have been focused on selling specifically to federal and local government entities and understand the requirements and expectations that they require. We hold numerous primary contracts for our end user to utilize.

### **Overview of our Conflict Minerals Code of Conduct Program**

Transource Service Corps commitment to acting in an socially and environmentally responsible manner will ensure that we will do our diligence in ensuring that products purchased for our OEM Desktop Computer systems are not being sourced by us or any of our suppliers from areas considered “Conflict minerals” as defined by the US legislation. Currently these include the metals tantalum, tin, tungsten and gold, which are the derivatives of the minerals cassiterite, columbite-tantalite and wolframite, respectively. The SEC rules define conflict minerals as 3TG metals and wherever extracted from South Africa in Sudan, Central Africa Republic, Congo Republic, Democratic Republic of the Congo, Uganda, Tanzania, Angola, Zambia, Rwanda or Burundi. We engage in ongoing supplier communications regarding the substance of conflict minerals and our objective of responsible sourcing of these minerals. We routinely request confirmation from our main system product suppliers to confirm where raw product is being procured with the expectation that all suppliers will source minerals responsibly.

### **Transource Desktop System Products**

Conflict minerals in the form of gold and the mineral derivatives tin, tantalum, and tungsten (collectively, “3TG”) are necessary to the functionality or production (“necessary conflict minerals”) of OEM computer systems which are sold to federal and local entities.

### **Design of our Conflict Minerals Program**

The Design of Transource’s Conflict minerals program is in conformity with the Organization for Economic Co-Operation and Development Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict-Affected and High Risk Areas and related to supplements in Tin, Tantalum and Tungsten and on Gold specifically as it relates to our position in the minerals supply chain as a “downstream” purchaser. We designed our due diligence measures and took into account our individual facts and circumstances and our downstream position in

the minerals supply chain. The OECD recommendations for downstream actors that have no direct relationships to smelters or refiners and the use of online information to provide information about smelters or refiners. Summarized below are the design components of our conflict minerals program:

1. Establishment a conflict minerals policy with respect of our OEM systems with senior management support with a Supply Chain Transparency System. Engagement with 3TG Direct Suppliers to communicate and reinforce our expectations with respect to necessary conflict minerals and encourage suppliers to be responsible in sourcing 3TG minerals.
2. Identification and assessment of risks in the supply chain including a mechanism by which risks are identified and assessed in the supply chain. Our system is designed to support the Conflict Minerals Program in systematically surveying, collecting, and analyzing information relating to 3TG facilities use of necessary conflict minerals in the supply chain for our desk top products on a yearly basis.
3. Design and implementation of a strategy to respond to such risks as they are identified, including assessment of information on the due diligence practices of 3TG facilities, formulation of a risk management plan, and reporting to senior management.
4. Report annually on our supply chain due diligence activities and update our Conflict Minerals Report, which is publicly available at [www.transsource.com/epeat/conflictmaterials.pdf](http://www.transsource.com/epeat/conflictmaterials.pdf).

### **Description of Due Diligence Measures Performed**

We identified our suppliers that we use in building our OEM Desktop systems containing materials, parts, components or products containing necessary conflict minerals. ("3TG Direct Suppliers") We undertook due diligence on the source and chain of custody of necessary conflict minerals from the relevant 3TG facilities and reviewed the results with President of Transsource Services Corp.

1. We require that those 3TG Direct Suppliers use the a Responsible Minerals Initiative and Conflict Minerals Reporting Template to obtain and provide to us information from their supply chains regarding relevant entities and the origin of necessary conflict minerals sourced by these entities.
2. Reviewed and discussed their submissions compared to our criteria, specifying deficiencies to be corrected in their responses and update or complete information reported to us so that it meets our expectations.
3. Providing training and education to support 3TG Direct Suppliers in completing the Template and answered any questions concerning the initiative.
4. Obtaining acceptable responses from 3TG Direct Suppliers and reviewing any information on countries of origin or recycled and scrap sourcing available online and from other sources.

As part of our due diligence measures:

- We compared the relevant 3TG facilities to the facilities that are listed by RMI as either compliant or in process with RMAP, which assesses facilities' systems and processes for traceability of ore and demonstration of conflict free sourcing at:  
RMI Website <http://www.responsiblemineralsinitiative.org> and  
RMAP list <http://www.responsiblemineralsinitiative.org/conformant-smelter-refiner-lists>

- We engaged suppliers when sourcing was unknown (directly or through a third party) to provide conflict minerals and to research and find where they are sourcing materials from.
- Educated and collect information on necessary on conflict minerals such as country of origin and encourage participation in meeting supply chain Conflict of Materials requirements.
- If any 3TG Direct Supplier reported to us a facility for which we had information that triggered one of our potential risk indicators, then we requested the supplier investigate whether or not that facility contributed 3TG, and if the supplier reported that it did, we asked that the supplier remove the facility from our supply chain.
- If we obtained information that indicated there was a potential risk associated with a particular supplier, we sought information from industry sources, news and media, stakeholders, and other relevant sources to support our decisions and actions to determine.

### **Reasonable Country of Origin Inquiry**

We conducted a reasonable country of origin inquire from our Transource systems component suppliers to determine whether any conflict minerals in our systems originated in the Conflict Minerals area's noted by the US Legislation to include recycled and scrap sources. To make this determination we have asked our direct suppliers who in turn asked their suppliers to provide us with relevant information and to report to us the entities that were providing necessary conflict minerals to them or their suppliers and from where those minerals were sourced.

### **Results of the Reasonable Country of Origin Inquiry Efforts**

For 2021, we conducted a supply chain survey of 13 suppliers that supply components in our desktop computers systems. We compared all entities reported to us by those 3TG Suppliers against the Responsible Minerals Initiative list of smelters, refiners, recyclers or scrap processors of conflict minerals in order to identify if the suppliers were using conflict minerals in any of the products supplied to us. As a downstream purchaser of products which contain conflict minerals, our due diligence measures can only provide reasonable, not absolute, assurance regarding the source and supply chain custody of the necessary conflict minerals. Our due diligence processes are based on the necessity of seeking data from our direct suppliers and those suppliers seeking similar information within their supply chains to identify the original sources of the necessary conflict minerals.

### **Results of our Reasonable Country of Origin Inquiry as of May 2021 are as follows:**

- 61% of surveyed suppliers provided a CMRT in response to our supply chain survey request.
- 7 of our 3TG Suppliers provided 347 Smelter locations that they currently or possibly used for 3TG minerals, 2 suppliers provided a declaration that all 3TG materials would not come from any conflict material zones, we will have requested a list of smelter location to verify.
- In our May 2021 review, 78% of all 3TG facilities reported to us are compliant, in process to become compliant, and/or are reasonably believed to provide only conflict minerals from recycled or scrap sources or to source conflict minerals from outside the Covered Countries.
- We will continue to follow up over the next year with the suppliers that didn't provide a response and complete a year over year view of all of the suppliers that we use for our desktop systems that reported to use 3TG minerals.

## Attachment B

### 3TG Facility List

This 3TG Facility List sets forth the name, location and status of all of the 3TG facilities that our desktop suppliers reported to us. It is the result of our review of data from several sources, including information reported to us by 3TG Direct Suppliers, obtained through supplemental engagement with certain 3TG facilities, and from the Responsible Minerals Initiative. In many cases, facility information was provided to us for the entire supply chain of 3TG Direct Suppliers, and did not identify with specificity those 3TG facilities believed to contribute necessary conflict minerals to Transource.
